HabitFlow – A Smart Habit Tracking iOS App

Project Overview

HabitFlow is a modern iOS application designed to help users build, track, and maintain daily habits. The app provides an intuitive interface for managing habits, visualizing progress, and staying motivated through interactive animations and feedback. The application will be developed using SwiftUI and SwiftData.

Objectives

- Allow users to create and manage up to 10 daily habits
- Track completion progress over time
- Provide visual feedback using animations
- Store all data locally using SwiftData
- Deliver a smooth, responsive user experience

Local Database

The app uses SwiftData for local persistence, enabling fast performance, offline functionality, and efficient data queries.

Core Features

- Create, edit, and delete habits
- Mark habits complete/incomplete
- Track progress and streaks
- Animated UI feedback
